
a
Monostable control (A)
Linear drift, same Jacobian as B at rest
Parasympathetic coordinate P (ms)
Sympathetic coordinate S (ms)
b
Bistable landscape (B)
Cubic drift: rest, saddle, stress attractor
separatrix
stress basin
saddle
stress attractor
Sympathetic coordinate S (ms)
c
Same pulse, similar peak, different fate
Distance from rest: median, 90% band (n = 2000 per system) and the replicate closest to the medians
pulse
Distance from rest (ms)
δ = 151 ms
91% in stress basin at t = 100 s; 7% sustained return
B bistable
100% sustained return; median T_rec = 6.2 s
A monostable
Time (s)
d
Baseline SD
similar medians
SD of distance (ms)
e
Peak displacement
similar medians
D_max (ms)
f
Sustained return
divergent
P_return (%)
100%
7%
g
Regime shift
divergent
P_transition (%)
91%
0%
